

VS

Vladimir Sabado

Software Engineer

Summary

Goal-oriented Software Engineer with professional experience in full-stack software development.

Education

Bachelor of Science: Computer Science

University of Arkansas - Fayetteville, AR

Bachelor of Science: Biology

University of Arkansas - Fort Smith - Fort Smith, AR

Work History

Software Engineer II

Affirma Consulting , Fayetteville, United States

Microsoft Project - 2019 to 2021

- Tech stack: AngularJS, .Net Framework, Razor pages, MS SQL, C#, Azure DevOps, Azure
- Tools: Visual Studio, Server Management Studio
- Full-stack development of a management tool used by Microsoft.
- Designed/Developed features according to client specifications.
- Implemented Azure Key Vault to safely store confidential data.
- Utilized website-first responsive design to maintain quality UX in any and all user devices.
- Developed an outlook addin using .NET Framework that allows the user to authenticate to the Azure Active Directory (AAD) and interface with the protected project API.
- Developed an interactive chat bot using Azure Bot Framework that authenticates to a protected resource using AAD, generate a JSON Web Token, and handles API interactions on the behalf of the user.
- Automated data retrieval, generation, and dispersal through the utilization of Microsoft Power Automate custom connectors.
- Mentored numerous Software Engineer interns on methodologies and Git.

Fiserv Project - Jun 2021 - December 2021

- Tech stack: Java, Spring boot, Oracle
- Tools: LucidChart, Figma, Jira, Concourse, TOAD, IntelliJ
- Assumed pod lead role in a team of 10 developers
- Planned the roadmap with other pod leads to ensure that all pods align regarding feature specifications and deployments.
- Delegated tasks to members of the team to ensure that all roadmap milestones are met, and facilitated deployment across all environments.
- Mentored junior developers on programming standards and conventions.
- Developed numerous microservices that served as the middleware for a financial software.
- Utilized RabbitMQ to facilitate data flow between some microservices.
- Implemented enhanced activity monitoring across all services using aspect-oriented programming.

Quality Assurance Analyst

Pernod Ricard USA, Fort Smith, AR

- Completed a solo project that significantly decreased distillation time from 2 hrs to 20 minutes.
